Front-End Engineer | React Developer | Full-Stack Engineer

React-focused full-stack developer with 4+ years building **high-performance, scalable, and user-friendly web applications**. Skilled in **React component libraries, UI/UX optimization, performance tuning, and maintainable API integration**. Experienced in mentoring teams, driving best practices, and delivering data-driven solutions in fast-paced environments.

Technical Skills

- **Programming:** JavaScript, TypeScript, Python, HTML5, CSS3, Node.js
- **Front-End:** React, Angular, jQuery, Bootstrap, Tailwind, Component Libraries
- **Back-End / APIs:** Express.js, Django, RESTful APIs, GraphQL
- **Databases:** SQL, PostgreSQL, MySQL, MongoDB
- **Cloud / DevOps:** AWS (S3, EC2, Lambda), GitHub Actions, Jenkins
- **Tools:** Git, Postman, Chrome DevTools, Performance Monitoring

Professional Experience

Full Stack Developer

Jack Sawyer Software – Seattle, WA | Nov 2022 – Present

Tech Stack: React, Django, Python, AWS, MySQL, PostgreSQL

- Developed **dynamic front-end interfaces with React**, improving user interaction and UX by 100% through performance tuning and modern design patterns.
- Built **component libraries and reusable UI elements**, supporting complex transactional workflows with a focus on accessibility and maintainability.
- Integrated **RESTful APIs and cloud services**, enabling secure and scalable data handling.
- Implemented **unit testing and code review practices**, ensuring reliability and high code quality.
- Mentored junior engineers and contributed to **team-wide best practices** in coding and deployment.

Software Engineer | Generative AI & Web Development

Scale AI – San Francisco, CA | Jan 2024 – Jun 2025

Tech Stack: React, Express.js, Node.js, Python, NumPy, PyTorch

- Developed **front-end-heavy applications** consuming complex data APIs, optimizing performance and response times.
- Designed and maintained **well-tested, maintainable React components** for data visualization and interactive dashboards.
- Collaborated with cross-functional teams to implement **feature-rich, user-focused solutions**, improving usability and end-user satisfaction.
- Managed CI/CD pipelines and automated testing, **ensuring smooth deployments and minimal downtime**.

Managing Director / Front-End Lead

Bishop Motion Pictures – Redmond, WA | Sep 2010 – Dec 2020

Tech Stack: HTML, CSS, JavaScript

- Led development of **interactive web content and UX-focused projects**, supporting large-scale creative campaigns.
- Designed and implemented **responsive interfaces and user flows**, enhancing engagement and accessibility.
- Mentored team members and ensured adherence to coding and design standards.

Key Achievements

- Spearheaded **React component library creation**, reducing front-end development time by 40%.
- Improved **performance and scalability** of high-traffic applications, resulting in measurable user satisfaction gains.
- Mentored junior engineers and promoted best practices in **testing, code reviews, and maintainable architecture**.
- Delivered **data-driven, polished UIs** that balance aesthetics, usability, and performance.
